

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

VOL. LXII.

L O N D O N :

Printed for LOCKYER DAVIS, in *Holbourn*,
Printer to the ROYAL SOCIETY.

M.DCC.LXXII.

A D V E R T I S E M E N T.

THE Committee appointed by the *Royal Society* to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society as from repeated declarations, which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume. And this information was thought the more necessary, not only as it had been the common opinion, that they were published by the authority, and under the direction, of the Society itself; but also, because several authors, both at home and abroad, have in their writings called them the *Transactions of the Royal Society*. Whereas in truth the Society, as a body, never did interest themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought adviseable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the

reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

At a C O U N C I L, January 28, 1773:

Resolved, That after Volume LXII. the *Philosophical Transactions* be published twice in a year; the first publication to be of the months of November and December of the preceding year, and January and February of the current year, as soon as may be after February, under the name of the “first part” of the volume: and the second publication to be of the remaining months unto the recess of the Society, as soon as may be after the recess, under the name of the “second part” of the volume.

Spots of Water in the Sea ; by the same.* p. 93
- XIV. *A Letter from Mr. Peter Dollond, to Nevil
Maskelyne, F. R. S. and Astronomer Royal ; de-
scribing some Additions and Alterations made to
Hadley's Quadrant, to render it more serviceable at
Sea.* p. 95
- XV. *Remarks on the Hadley's Quadrant, tending
principally to remove the Difficulties which have
hitherto attended the Use of the Back-observation,
and to obviate the Errors that might arise from a
Want of Parallelism in the two Surfaces of the
Index-Glass. By Nevil Maskelyne, F. R. S. Astro-
nomer Royal.* p. 99
- * XV. *Account of the Irruption of Solway Moss on
December 16, 1772 ; in a Letter from Mr. John
Walker, to the Earl of Bute, and communicated by
his Lordship to the Royal Society.* p. 123

- XVI. *A Letter from John Zephaniah Holwell, Esq; F. R. S. to John Campbel, Esq; F. R. S. giving an Account of a new Species of Oak.*
p. 128
- XVII. *An Account of the Death of a Person destroyed by Lightning in the Chapel in Tottenham-Court-Road and its Effects on the Building; as observed by Mr. William Henly, Mr. Edward Nairne, and Mr. William Jones. The Account written by Mr. Henly.*
p. 131
- XVIII. *A Letter from Thomas Ronayne, Esq; to Benjamin Franklin, LL. D. F. R. S. inclosing an Account of some Observations on Atmospheric Electricity; in regard of Fogs, Mists, &c. with some Remarks; communicated by Mr. William Henley.*
p. 137
- XIX. *Observations on different Kinds of Air: By Joseph Priestley, LL. D. F. R. S.*
p. 147
- XX. *An Essay on the periodical Appearing and Disappearing of certain Birds, at different Times of the Year. In a Letter from the Honourable Daines Barrington, Vice-Pref. R. S. to William Watson, M. D. F. R. S.*
p. 265
- XXII. ΚΟΣΚΙΝΟΝ ΕΡΑΤΟΣΘΕΝΟΥΣ, or, the Sieve of Eratosthenes. *Being an Account of his Method of finding all the Prime Numbers; by the Rev. Samuel Horsley, F. R. S.*
p. 327
- XXIII. *A Letter from Mr. Christopher Gullet to Mathew Maty, M. D. Sec. R. S. on the Effects of Elder, in preserving Growing Plants from Insects and Flies.*
p. 348
- XXIV. *A*

C O N T E N T S.

ix

- XXIV. *A Letter from John Call, Esq; to Nevil Maskelyne, F. R. S. Astronomer Royal, containing a Sketch of the Signs of the Zodiac, found in a Pagoda, near Cape Comorin in India.* p. 353
- XXV. *An Account of the Flowing of the Tides in the South Sea, as observed on board of His Majesty's Bark the Endeavour, by Lieut. J. Cook, Commander, in a Letter to Nevil Maskelyne, Astronomer Royal, and F. R. S.* p. 357
- XXVI. *An Account of a new Electrometer, contrived by Mr. William Henly, and of several Electrical Experiments made by him, in a Letter from Dr. Priestley, F. R. S. to Dr. Franklin, F. R. S.* p. 359
- XXVII. *Meteorological Observations at Ludgvan in Mount's Bay, Cornwall, 1771: By William Borlase, D. D. F. R. S. Communicated by Dr. Jeremiah Milles, Dean of Exeter, and F. R. S.* p. 365
- XXVIII. *Account of several Quadrupeds from Hudson's Bay, by Mr. John Reinhold Forster, F. R. S.* p. 370
- XXIX. *An Account of the Birds sent from Hudson's Bay; with Observations relative to their Natural History; and Latin Descriptions of some of the most uncommon.* By the Same. p. 382
- XXX. *Geometrical Solutions of three celebrated Astronomical Problems, by the late Dr. Henry Pemberton, F. R. S. Communicated by Matthew Raper, Esq; F. R. S.* p. 434
- XXXI. *On the Digestion of the Stomach after Death, by John Hunter, F. R. S. and Surgeon to St. George's Hospital.* p. 447

VOL. LXII.

b

XXXII. Ex-

- XXXII. *Experiments and Observations on the Waters of Buxton and Matlock, in Derbyshire, by Thomas Percival, of Manchester, M. D. F. R. S.* p. 455
- XXXIII. *Some Account of a Body lately found in uncommon Preservation, under the Ruins of the Abbey, at St. Edmund's-Bury, Suffolk; with some Reflections upon the Subject: By Charles Collignon, M. D. F. R. S. and Professor of Anatomy at Cambridge.* p. 465
- XXXIV. *A Letter from Richard Pulteney, M. D. F. R. S. to William Watson, M. D. F. R. S. concerning the medicinal Effects of a poisonous Plant exhibited instead of the Water Parsnep.* p. 469
- XXXV. April 21, 1772. *Experiments on two Dipping-Needles; which Dipping-Needles were made agreeable to a Plan of the Reverend Mr. Mitchell, of Thornhill in Yorkshire, and executed for the Board of Longitude, by Mr. Edward Nairne of Cornhill, London.* p. 476
